LIVE MUSIC CONSOLE

GRINTA reads and plays **Midi** and **Mp3** Karaoke music files. It connects to the TV set and shows lyrics and chords in sync with music, together with all live functions.

The embedded mixer enables real time management of the Midi File sound. You can practise alone or enjoy it with friends using the **"Arena"** function, which recognizes whether you sing in tune and attributes a score to your vocal performance. The **"Maestro"** mode shows the song chords* for loop practising on a piece or a section. Grinta includes a series of effects that will make for a fun and original musical evening. Grinta is available in two different packages; **Basic** edition and **Gold** edition (that includes Microphone, Compact Flash Memory and 124 Midi Files already loaded).
