THE LIVE MACHINE

[www.m-live.com](http://www.m-live.com)

**MERISH** plays and mixes  
Midi or MP3 format music files.

With Midi Files, mixing is possible "from" and "to" any point in songs, and with different connection modes: immediate and mixed with various cross fade curves. Merish identifies the musical phrases in Midi songs and connects them by means of an intelligent algorithm that works on their sounds and rhythms just like a DJ - Arranger. Playlists are created in real time: just choose the next song, and Merish will mix the song being played with the one to follow. The connection is made seamlessly.

- Midi archive with search by title, artist and genre
- Real-time track editing
- Compact Flash and USB Pen Drive memory
- Dimensions: W. 31 cm - H. 8.5 cm - D. 24 cm / Weight 2,5 kg

**MERISH** has a large **LCD TFT 4.3"** 95 x 33mm colour display that continuously displays the text of the song being played, even if other functions are activated. Six sliders allow real-time modification of the volume of the tracks of the Midi File being played. All audio levels are easily controlled from the panel, the master volume, Midi backing track volume, Mp3 backing track volume, and the volume of the Midi file tracks. The type and quantity of the effect applied to the voice can also be selected.

The **MERISH** generates its sound by means of two powerful latest-generation **DSPs**, capable of playing two **32-channel, 108-note** Midi Files simultaneously. The sounds are loaded in a 64Mb memory bank, and have been specially developed to play **M-Live** brand Midi Files: always the very best. For Merish we have created 625 sounds & percussions and 25 drum kits, in line with the latest musical trends.

The Microphone and Audio section includes a real **digital Mixer**, for regulating all the Voice and Musical Backing Track parameters. The Microphone channel has two separate effects, a dynamic compressor and a **4-band equalizer**.

**MERISH** is a complete, user-friendly device that delivers all the functions needed for the Live performance of Midi and Mp3 files.
