OKYWEB³

Okyweb 3 represents the evolution of a great success. Europe's best selling Karaoke Player acquires new functions, such as Karaoke MP3 files reading.

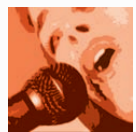

OKYWEB³ memorises and plays thousands of songs in every format, including **Karaoke Mp3**. It displays lyrics and chords, includes a **MIDI Expander** and a **Micro Mixer** fitted with microphone channel, **Multi-Effect** and **Equalizer**.

OKYWEB³ connects straight to a PC, can access Internet, read and convert Standard and MF3 MIDI files and features the revolutionary new 32-track MF5 format.

CUTTING-EDGE SOUNDS FOR AN ELECTRIFYING EXPERIENCE

OKYWEB³ provides all the acoustics you ever wanted: Rhythm & Blues, Drums, Latin, powerful basses, ethnic percussions, disco synth and loads more. All sounds can be edited to create an almost infinite collection of different tones. With the dedicated equalizer you can then check the overall sound of the resulting piece. **OKYWEB³** has 32 MIDI channels with 77-124 note polyphony.

A MULTI-EFFECT EQUALIZER FOR YOUR VOICE

The digital microphone channel comes complete with dedicated Equalizer, Echo and Reverb. The EQ can be converted to 3-band, 4-band, 3-band semi-parametric and 4-band parametric graphics. The Echo feature has a "Sync to MIDI" function to synchronize repetitions with the background music BPM.

MF5, THE NEW FRONTIER

The new MF5 format has 32-tracks, proprietary sounds and extra tracks for voice editing purposes. M-live will be publishing scores of new MF5s specifically for **OKYWEB³** every month.

AND THAT'S NOT ALL

OKYWEB³ connects straight to a PC via the USB port, it has a MIDI IN port and a really useful Karaoke Rolling function. It also has a VIDEO IN port to connect it to a video camera.

OKYWEB³ SUPER GOLD

OKYWEB³ includes a wide standalone screen to view lyrics and chords on stage and check all Live functions.

Okybag: handy, smart carry case.
Okyflash: 32-128MB memories.
Okywrite: to write Compact Flash from a PC.
Okysleg and **Okystand:** handy stage equipment.
